

hp designjet 800ps  
large-format printer

The professional choice  
for ultimate photo quality.

**The HP DesignJet 800PS printer is the professional and robust graphics printer for graphic design studios, in-house graphic departments and advertising agencies, delivering ultimate photo quality with continuous tones, smooth transitions and a wide colour gamut. Complete with a "virtual computer" inside, the printer does all of the processing work and immediately frees up your own computer.**

#### Two sizes:

The printer comes in two sizes, with a media path that is either 107 cm or 61 cm wide. Stand and media bin are optional on the 61 cm model.

#### Ultimate photo quality<sup>1</sup>

- Ultimate photo quality is achieved using HP colour layering technology and up to 2400 dpi resolution<sup>2</sup>.
- Many more colours are available per printed dot as the printer layers different colour ink drops over each other to create new colours.

#### "Virtual computer" inside

Your computer is immediately freed by a "virtual computer" inside the printer:

- Embedded Adobe® PostScript® 3™ RIP, with drivers for Macintosh® and Windows®.
- Embedded HP-GL/2 processor, with drivers for AutoCAD® and Windows.
- 160 MB of RAM and a 6 GB hard disk.
- Powerful network card: HP JetDirect 10/100Base-TX print server, as well as USB 1.1 and parallel ports.

#### Professional colour management

- Accurate colours are obtained through Automatic PANTONE® Calibration, offset-printing press emulations (EuroScale, SWOP, DIC, and TOYO), and ICC profiles for Mac and Windows.
- Consistent colours are achieved every time, regardless of printhead usage, ambient temperature or ink levels, using automatic closed-loop-colour calibration.

#### Fast and efficient printing

- Robust printer for workgroups of 3 to 10 people, with print speeds of up to 7.9 m<sup>2</sup>/hr.
- Supports queuing and nesting, and processes next jobs while printing.
- Three portrait A3+ images fit side by side on the 107 cm model.

#### No hassle

- Drivers are easy to install and intuitive to use, an ink-set change takes less than 1 minute, the control panel is simple to navigate, and media loading is smooth and straight-forward.

#### Great media flexibility

- A wide choice of HP Premium Printing Material is available, including HP Coated Paper, HP Heavyweight Coated Paper, HP High-Gloss Photo Paper, HP Satin Poster Paper, HP Studio Canvas, HP Bright White Inkjet Paper, HP Translucent Bond, HP Natural Tracing Paper, HP Vellum, HP Clear Film and HP Matte Film.

#### Unattended printing

- The printer can work unattended with its modular, 69 cc ink cartridges, long-life printheads, 45.7 m media rolls, automatic alignment and cutting, and stacking of finished prints in the media bin (optional on the 61 cm model).

#### HP Warranty

- One year warranty with free, on-site, next business-day service, backed by HP Support centres around the world. HP SupportPacks and Service Agreements allow you to extend your warranty to up to 5 years, and can provide around-the-clock service with a response time of within 4 hours, every day of the year (depending on the country).
